

Integrated Management System Policy Statement

The Company have carried out a complete risk review of the context of the organisation identifying the external and internal interested parties. This has involved defining our business context including the nature, scale and environmental impacts of our activities, products and services, based on that review we have created this policy statement.

Senior management are committed to fulfilling our legal and other requirements to support our intention to eliminate hazards and reduce occupation health and safety risks.

Senior management has through this policy statement and supporting documented information established, implemented, and will maintain the scope of the organisation.

“Design support & supply of pipeline intervention equipment, repair products and services”.

We are committed to providing the highest quality of service and product to our customers, consistent with sound economic practice that will ensure client satisfaction and the company’s leadership in its field.

Our services must meet the needs of our customers and quality of service within the business and is considered the responsibility of each and every person involved with the business.

Our goal is to get things right first time and every time through the regular and systematic review of our management system which is aligned to and integral to our strategic business direction.

As well as implementing and continually improving the effectiveness of this system we will provide the personnel and resources to ensure that the importance of meeting and exceeding customer requirements is communicated and understood throughout our organization.

We are committed to the consultation and participation of workers, and, where they exist, workers’ representatives

We are committed to the health and safety working conditions for the prevention of work-related injury and ill-health of all employees including enhancing the working environment whilst protecting the environment where practicable with consideration of emissions to air/water/land ensuring the prevention of contamination.

Furthermore, we will establish, monitor, and review objectives for quality, environmental and occupational health and safety on a regular basis in order to foster continual improvement in all our activities. This provides a framework for integration of the ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 standards.

This policy will be reviewed for continuing suitability and effectiveness at management reviews and as required and appropriate.

This policy will be communicated within the organisation and be available to any interested parties, as appropriate and relevant.

David Csehi
